Master of Computer Applications
LAB RECORD

Course Name: 20MCA133 WEB PROGRAMMING LAB

NAME.....

REG. NO..... SEMESTER.....

MONTH & YEAR.....

Lab Cycle 1

CO1: Explore markup languages features and create interactive web pages using them.

Program # 1

1.Create a simple web application to display your Resume (CV) using various text formatting features, table, list and link within a page in HTML.

PROGRAM CODE:

page 1.html

```
<html>
<head>
<title>CV</title>
</html>
<body>

<p><h1>Personal Datas</h1></p>
<p>Meenakshi Sajeerv</p>
<p>Melethuparmbil,Venkida</p>
<p>10-10-2002</p>
<p><h1>Educational Qualifications</h1></p>
<table border=1>
<tr>
<th>level</th>
<th>board</th>
<th>Institution</th>
<th>percentage</th>
</tr>
<tr>
<td>10</td>
```

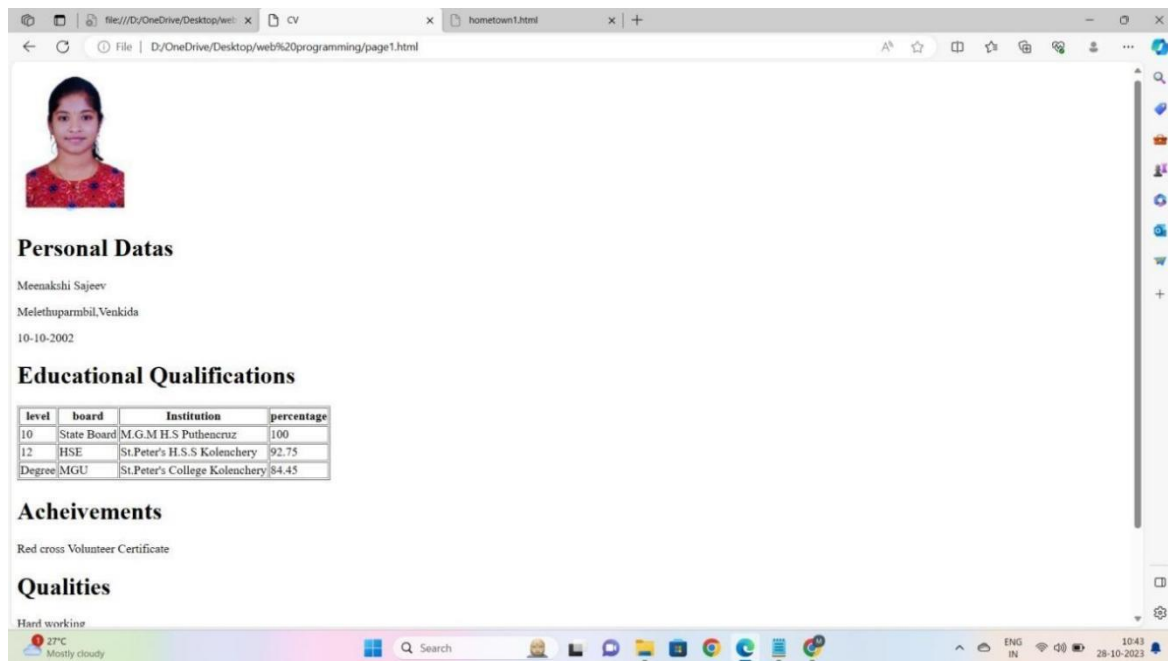

```
<td>State Board</td>
<td>M.G.M H.S Puthencruz</td>
<td>100</td>
</tr>
<tr>
<td>12</td>
<td>HSE</td>
<td>St.Peter's H.S.S Kolenchery</td>
<td>92.75</td>
</td>
<tr>
<td>Degree</td>
<td>MGU</td>
<td>St.Peter's College Kolenchery </td>
<td>84.45</td>
</tr>
</table>
<p><h1>Acheivements</h1></p>
<p>Red cross Volunteer Certificate</P>
<p><h1>Qualities</h1></p>
<p>Hard working</p>
<p>Patient</p>
<p>Communication</p>
<a href="page2.html">visit page2</a><br>
<a href="#top">top</a>
</body>
</html>
```

20MCA133 Web Programming Lab Record

page 2.html

```
<html>
<body>
<p><h1>Languages</h1></p>
<p>English</p>
<p>Malayalam</p>
<p>Hindi</p>
<p><h1>Hobbies</h1></p>
<p>Painting</p>
<p>Listening Music</p>
<a href="page1.html">visit page1</a><br>
</body>
</html>
```

OUTPUT:

20MCA133 Web Programming Lab Record

The screenshot displays a web browser window with two tabs: 'CV' and 'hometown1.html'. The active tab shows a personal website with the following content:

Personal Datas

Meenakshi Sajeev
Melethuparmbil,Venkida
10-10-2002

Educational Qualifications

level	board	Institution	percentage
10	State Board	M.G.M H.S Puthencruz	100
12	HSE	St.Peter's H.S.S Kolenchery	92.75
Degree	MGU	St.Peter's College Kolenchery	84.45

Acheivements

Red cross Volunteer Certificate

Qualities

Hard working
Patient
Communication

[visit_page2](#)
[top](#)

The second screenshot shows the same browser window with the 'CV' tab active, displaying the 'page2.html' file. The content includes:

Languages

English
Malayalam
Hindi

Hobbies

Painting
Listening Music

[visit_page1](#)

Lab Cycle 2

CO2: Learn and design client-side validation using scripting languages.

Program # 6

6.Create a HTML page to explain the use of various predefined functions in a string and math

PROGRAM CODE:

Math.html

```
<html>
<head>
<title>Math Functions</title>
</head>
<body style="background-color:powderblue;">
<h1>Math Function Calculator</h1>
<label for="userInput">Enter a number:</label>
<input type="text" id="userInput"><br>
<button onclick="performMathFunctions()">Submit</button>
<p id="output"></p>
<script>
function performMathFunctions() {
var userInput = document.getElementById("userInput").value;
var number = parseFloat(userInput);
var squareRoot = Math.sqrt(number);
var logValue=Math.log(number);
var logtenValue=Math.log10(number);
var absoluteValue = Math.abs(number);
var rounded = Math.round(number);
var ceilvalue=Math.ceil(number);

var floorvalue=Math.floor(number);
var r=Math.random();
var t=Math.trunc(number);
var s=Math.sign(number);
var output= "Square Root: " + squareRoot + "<br>";
output += "Logarithm: " + logValue+ "<br>";
output += "Logarithm to base 10: " +logtenValue+ "<br>";
output += "Absolute Value: " + absoluteValue + "<br>";
output += "Rounded Value: " + rounded+"<br>";
output += "Ceil Value: " + ceilvalue + "<br>";
output += "Floor Value: " + floorvalue + "<br>";
output += "Random Value: " + r+"<br>";
output += "Trunc Value: " + t+"<br>";
output += "Sign Value: " + s+"<br>";
```

```

document.getElementById("output").innerHTML = output;

}
</script>
<h1>Min and Max Calculator</h1>
<label for="numbers">Enter a list of numbers (comma-separated):</label>
<input type="text" id="numbers"><br>
<button onclick="calculateMinMax()">Calculate</button>
<p id="result"></p>
<script>
function calculateMinMax() {
const inputElement = document.getElementById("numbers");
const resultElement = document.getElementById("result");
const input = inputElement.value;
const numbers = input.split(',').map(item => parseFloat(item));
const min = Math.min(...numbers);
const max = Math.max(...numbers);
resultElement.innerHTML = `Minimum: ${min}<br>Maximum: ${max}`;
}
</script>
<h1>Power Calculator</h1>
<label for="base">Enter the base number:</label>
<input type="text" id="base">
<label for="power">Enter the exponent:</label>
<input type="text" id="power"><br>
<button onclick="calculatePower()">Calculate</button>
<p id="res"></p>
<script>
function calculatePower()
{
    var baseElement = document.getElementById("base");
    var powerElement = document.getElementById("power");
    var resultElement = document.getElementById("result");
    var base = parseFloat(baseElement.value);
    var power = parseFloat(powerElement.value);
    var res1 = Math.pow(base, power);
    res= "Power: " + res1 + "<br>";
    document.getElementById("res").innerHTML = res;
}
</script>
</body>
</html>

```

string.html

```

<html>
<head>
<title>String Functions</title>
</head>
<body style="background-color:powderblue;">

```

```

<h1>String Functions.</h1>
<label for="inputString">Enter a string:</label>
<input type="text" id="inputString"><br>
<label for="concatString">Enter a string to concatenate:</label>
<input type="text" id="concatString"><br>
<label for="replacePattern">Enter a pattern to replace:</label>
<input type="text" id="replacePattern"><br>
<label for="replacementString">Enter a replacement string:</label>
<input type="text" id="replacementString"><br>
<label for="start">Enter the starting index for substring/slice:</label>
<input type="number" id="start"><br>
<label for="end">Enter the ending index for substring/slice:</label>
<input type="number" id="end"><br>
<button onclick="performStringFunctions()">Submit</button>
<p id="output"></p>
<script>
    function performStringFunctions() {
        var inputString = document.getElementById("inputString").value;
        var length = inputString.length;
        var uppercase = inputString.toUpperCase();
        var lowercase = inputString.toLowerCase();
        var concatString = document.getElementById("concatString").value;
        var replacePattern = document.getElementById("replacePattern").value;
        var replacementString = document.getElementById("replacementString").value;
        var start = parseInt(document.getElementById("start").value);
        var end = parseInt(document.getElementById("end").value);
        var concatenatedString = inputString.concat(concatString);
        var replacedString = inputString.replace(replacePattern, replacementString);
        var substrResult = inputString.substr(start, end - start);
        var sliceResult = inputString.slice(start, end);
        var substringResult = inputString.substring(start, end);

        var output = "Length: " + length + "<br>";
        output += "Uppercase: " + uppercase + "<br>";
        output += "Lowercase: " + lowercase + "<br>";
        output += "Substring (using substring): " + substringResult + "<br>";
        output += "Substring (using substr): " + substrResult + "<br>";
        output += "Concatenated String: " + concatenatedString + "<br>";
        output += "Slice: " + sliceResult + "<br>";
        output += "Replaced String: " + replacedString + "<br>";
        output += "Original String: " + inputString + "<br><br>";

        document.getElementById("output").innerHTML = output;
    }
</script>
</body>
</html>

```

frammathstring.html

```
<html>
<frameset cols="50%,50%">
<frame src="newstring.html"></frame>
<frame src="newmath.html"></frame>
</frameset>
</html>
```

OUTPUT:

The screenshot shows a web browser with two tabs: 'Calendar Generator' and 'newmathstring.html'. The address bar shows the file path: 'D:/OneDrive/Desktop/web%20programming/newmathstring.html'. The browser displays two side-by-side web pages.

String Functions.

Enter a string:
Enter a string to concatenate:
Enter a pattern to replace:
Enter a replacement string:
Enter the starting index for substring/slice:
Enter the ending index for substring/slice:

Length: 6
Uppercase: ANIMAL
Lowercase: animal
Substring (using substring): anima
Substring (using substr): anima
Concatenated String: animallion
Slice: anima
Replaced String: animal
Original String: animal

Math Function Calculator

Enter a number:

Square Root: 4.847679857416329
Logarithm: 3.157000421150113
Logarithm to base 10: 1.3710678622717363
Absolute Value: 23.5
Rounded Value: 24
Ceil Value: 24
Floor Value: 23
Random Value: 0.7981717582631946
Trunc Value: 23
Sign Value: 1

Min and Max Calculator

Enter a list of numbers (comma-separated):

Minimum: 1
Maximum: 78

Power Calculator

Enter the base number: Enter the exponent:

Power: 100

Lab Cycle 2

CO2: Learn and design client-side validation using scripting languages.

Program # 7

7. Generate the calendar using JavaScript code by getting the year from the user.

PROGRAM CODE:

[illegible]

```

    for (var i = 0; i < 6; i++) {
    var week = [];
    for (var j = 0; j < 7; j++) {
        if (i === 0 && j < firstDay) {
            week.push("");
        } else if (day > lastDay) {
            week.push("");
        } else {
            week.push(day);
            day++;
        }
    }
    calendarArray.push(week);
}
var calendarHTML =
"<table><tr><th>Sun</th><th>Mon</th><th>Tue</th><th>Wed</th><th>Thu</th><th>Fri<
</th><th>Sat</th></tr>";
    for (var i = 0; i < 6; i++) {
        calendarHTML += "<tr>";
        for (var j = 0; j < 7; j++) {
            if (calendarArray[i][j] === "") {
                calendarHTML += "<td></td>";
            } else {
                calendarHTML += "<td>" + calendarArray[i][j] + "</td>";
            }
        }
        calendarHTML += "</tr>";
    }
    calendarHTML += "</table>";
    calendar.innerHTML = calendarHTML;
}
function getMonthName(month) {
var monthNames = [
    "January", "February", "March", "April", "May", "June",
    "July", "August", "September", "October", "November", "December"
];
    return monthNames[month - 1];
}
</script>
</center>
</body>
</html>

```

OUTPUT:

esktop/web%20programming/calender.html

A ☆

Calender generator

Enter a year (like 2023):

Enter a month (1-12):

Calendar

October 2023

Sun	Mon	Tue	Wed	Thu	Fri	Sat
1	2	3	4	5	6	7
8	9	10	11	12	13	14
15	16	17	18	19	20	21
22	23	24	25	26	27	28
29	30	31				

Cycle 2

CO2: Learn and design client-side validation using scripting languages

Program # 8

8.Create a HTML registration form and to validate the form using JavaScript code.

PROGRAM CODE:

```
<!DOCTYPE html>
<html>
<head>
<meta charset="UTF-8">
<title>Student Registration Form</title>
<style>
  body {
    font-family: Arial, sans-serif;
    background-image: url("clg.jpeg");
    margin: 0;
    padding: 0;
  }

  .container {
    width: 50%;
    margin: 0 auto;
    background-color: #fff;
    padding: 20px;
    border: 1px solid #ccc;
  }

  .form-group {
    margin: 10px 0;
  }

  label {
    display: block;
    font-weight: bold;
  }

  input[type="text"],
  input[type="date"],
  select {
    width: 100%;
```

20MCA133 Web Programming Lab Record

```
padding: 10px;
border: 1px solid #ccc;
border-radius: 4px;
margin-top: 5px;
}
```

```
input[type="radio"],
input[type="checkbox"] {
margin-right: 10px;
}
```

```
input[type="submit"] {
background-color: #007bff;
color: #fff;
padding: 10px 20px;
border: none;
border-radius: 4px;
cursor: pointer;
}
```

```

OUTPUT:

The screenshot shows a web browser window with the address bar displaying "D:/OneDrive/Desktop/WEBPROGRAMINGCOLLEGE/EXAM.html". The page content is a white box with a light gray border, titled "Online Exam" in bold black text. Below the title, there are two input fields. The first is labeled "Enter your name:" and contains the text "MEENAKSHI SAJEEV". The second is labeled "Enter your email:" and contains the text "meenu@gmail.com". Below these fields is a green button with the text "Start Exam".

The screenshot shows a web browser window with the address bar displaying "D:/OneDrive/Desktop/WEBPROGRAMINGCOLLEGE/EXAM.html". The page content is a white box with a light gray border, titled "Online Exam" in bold black text. Below the title, there are two multiple-choice questions. The first question is "1. How many months are in a year?" with options 10, 8, 12 (selected), and 13. The second question is "2. How many weeks are in a month?" with options 3, 4 (selected), 5, and 2. Below the questions is a green button with the text "Submit Exam".
